HYDRAULIC PLATFORM LIFTS

If you are looking for a hydraulic lift for your boat then SeaLift has the perfect, Patented design that uses a Single Point of Power utilizing one cylinder and two hydraulic lines outboard of the transom.

While other hydraulic lifts on the market use up to four cylinders in their design SeaLift's Patented design accomplishes a lot more with only one cylinder while greatly reducing the number of unnecessary parts exposed to sea water, significantly reducing annual maintenance and increasing service life.

Although SeaLift's smart design uses fewer cylinders, it still has plenty of power! And depending on your boat's capabilities, we have lifting capacities from 1,000 to 3,000 + lbs. with the Single Point of Power.

Each SeaLift Platform Lift is individually engineered to guarantee a perfect fit for your boats specific Make, Model and Year eliminating the need for shims, adapter brackets, or expensive fiberglass modifications to your boat's transom. Since the SeaLift Platform Lift is custom built for your boat, installation is straight forward allowing marine technicians at marina service facilities to install the SeaLift in a couple of days.

SeaLift's Patented (US Patent # 7707955B1) design is Simply the Best!

HYDRAULIC PLATFORMS

EXCLUSIVE POP-UP-CHOCKS

SeaLift's Exclusive Pop-Up Chocks can be installed on all of our platforms to carry your Tender or Personal Water Craft (PWC). These Pop-Up Chocks allow you to keep a perfectly smooth, flat Swim Platform, that Pop Up to carry your tender!

SeaLift Pop-Up Chocks are manufactured so that they not only retract flush into the fiberglass pocket when not in use, but they are also self-adjusting to fit the bottom of your tender.

Did you know chocks can be purchased separately?

If you already have a swim platform on your boat, you can purchase our Pop-Up chocks separately and install them on your existing Swim Platform!

FACTORY OPTION FROM THESE & OTHER BOAT BUILDERS

THE HINCKLEY COMPANY®

SEALIFT CAPACITIES

SeaLift system capacity is custom built to fit your boat and in available in:

BEST IN CLASS DESIGN

SINGLE POINT OF POWER

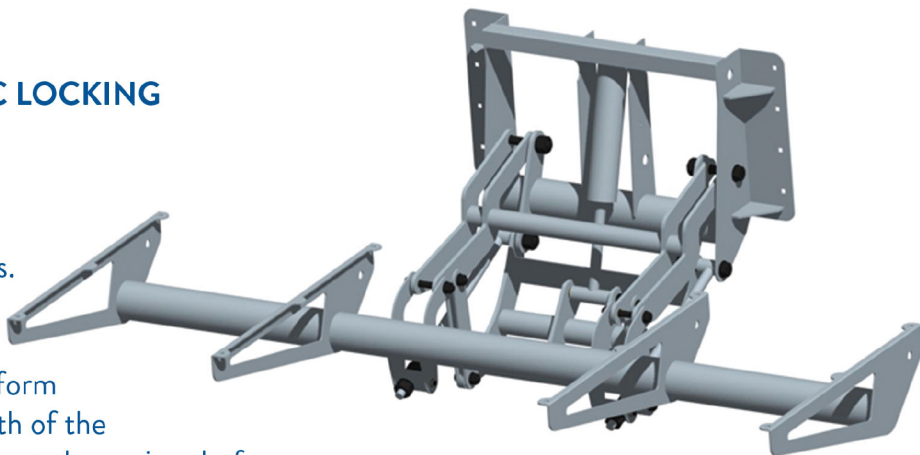

Our Patented Single Point of Power system eliminates half the hydraulic cylinders, fittings, connections and hydraulic lines resulting in significant reduction in complexity greatly enhancing reliability and trouble free service.

This Single Point of Power also eliminates uneven lifting of the platform and “crabbing”.

AUTOMATIC MECHANICAL GEOMETRIC LOCKING PLATFORM STABILITY SYSTEM

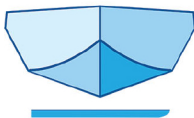

Our unique locking system relies on geometry not more hydraulic lines, valves, sequenced operation, or sensitive limit switches.

The SeaLift Locking System uses geometry to simply work every time! Additionally, our Platform Stability System positively locks the entire width of the platform to provide maximum stability throughout the entire platform.

Stainless Steel Construction guarantees long term performance in the harshest sea conditions.

- SIMPLY BETTER!

THE SEALIFT PLATFORM ALSO INCLUDES

- Stainless Steel Construction
- 954 Navel Bronze bushings
- Custom Engineered Hydraulic Lift Mechanism
- Custom Designed Swim Platform
- SeaLift's Exclusive Pop-Up Chocks
- Swim Ladder
- 4 Stainless Steel Tie Down Straps
- Folding Pad-Eyes
- Hydraulic Power Unit (HPU)
- Control harness Wiring
- Wireless Remote Control Key Fobs (2)
- Corded Controller
- All Hardware Required for Installation
- Anti-fouling Paint
- One Year Warranty
- Fiberglass, Aluminum, Real Teak, and Synthetic surfaced platforms available

WIRELESS REMOTE CONTROL

Featuring 16 - 2 way channels including:

**iPhone, iPad &
Android Smartphone control**
with Back up Corded controller.
